Key: Registration details

Purchasers of MVA Stock

If you have purchased MVA stock from a registered MVA flock to put into your own MVA registered flock, please note that SRUC rules state those animals should be tested within 12 months of purchase.

Gimmering – Accredited ewe lambs may be purchased and sold as accredited gimmers the following year under some circumstances. In summary:

- The ewe lambs may join an established accredited flock. In this case they are treated as added accredited animals (see Rule 6.2), and require an added accredited animal test 6 to 12 months after joining the flock, or before sale if this is earlier.

OR

- The ewe lambs are set up as a separate fully biosecure group. The group retains accreditation, but lose it if they are not all tested by 13 months after establishing the group (the test is due in 6-12 months, plus the one month grace period routinely added to all health certificates). If sold before the group has been established for 13 months, they can be sold as accredited with no additional testing.

THE LLEYN BREED — THE SHEEP OF THE FUTURE

A medium-sized maternal sheep breed originating in the Lleyn Peninsula in North West Wales, almost unknown in the 1960s, but now widespread across the whole British Isles and beyond. The Lleyn Sheep Society was formed in 1971 and its dynamic promotion of this excellent breed has resulted in Lleyn being one of the most numerically important maternal breeds in the UK.

Medium Sized and Easily Handled

The Lleyn ewe is smaller in size (65-85 kg) than other breeds used to produce prime lamb but is capable of rearing more than her own body weight of lambs at 14 weeks. This enables a higher stocking rate to be achieved, maximising kg of lamb produced per Ha.

Outstandingly Maternal and Productive

The Lleyn ewe mothers her newborn lambs without any fuss, but with great enthusiasm, whether she is an older, experienced ewe or a ewe lamb lambing for the first time. She is an excellent milker and her lambs are remarkably quick getting to their feet and suckling, particularly important when lambing outside in less-than-perfect-weather conditions!

Pure-bred, Cross-bred and Carcase Quality

The Lleyn ewe delivers outstanding maternal performance and efficiency, whether bred pure or crossed with any terminal sire. Pure-bred twins can be ready for slaughter at 14-16 weeks of age and with highly satisfactory carcasses (R3L or better).

When crossed with a terminal sire, the cross-bred lambs grow and grade extremely well (typically Es and Us).

Lleyn Rams

Lleyn rams are widely used for crossing on other breeds, particularly hill and upland breeds to increase lambing percentage of the resultant breeding ewes and to improve carcase quality. Lleyn rams have also been successfully used for the same reasons on commercial crossbreds with too-high terminal content.

Buy with confidence

You can have confidence in stock you buy at a Lleyn Sheep Society Sale. All stock are inspected pre-Sale for Health and Type. All rams have been inspected by the Society Ram Inspector and are licensed for life.

Some stock will have Posters indicating that they come from LLEYN GOLD flocks and some stock will have DNA Posters indicating that the animals have been DNA genotyped for specific characteristics (health, prolificacy, conformation)
