Breed Characteristics

The Ideal Lleyn

Revised May 2016, and supersedes all previous details of the Lleyn breed

HEAD	Distinctive and feminine; warm white in colour; wide forehead; good length from eye to nose, straight to slightly dished and narrowing towards the nose; bright lively eyes; black nose.
EARS	Medium size and thickness and black spots desirable; base preferably starting from the wool.
NECK	Average length, well set on shoulders
BREAST	Wide and well forward
SHOULDER	Well set.
RIB	Long and well arched.
BACK	Good length
LOIN	Broad; well joined to rump, well set tail
LEGS	Average length, with no wool lower than the hock. Colour warm white.
BONE	Flat.
TAIL	The tail should be docked according to current legal practice.
WOOL	Containing no kemp, of good length, dense and of high quality. Excessive peeling/stripping of wool is discouraged within the breed
RAMS	Hornless.

The aim of the Lleyn Sheep Society is to maintain the Lleyn sheep as a medium sized ewe with highly respected maternal traits which suit today's commercial sheep producer.

Ram details:

*There is a percentage of Lleyrn Flocks **Performance Recording**. Please note the indexes given out at the time of sale are a representation of these flocks only and not the whole breed. It is the responsibility of the prospective buyers to understand this information.*

A medium-sized maternal sheep breed originating in the Lleyn Peninsula in North West Wales, almost unknown in the 1960s, but now widespread across the whole British Isles and beyond. The Lleyn Sheep Society was formed in 1971 and its dynamic promotion of this excellent breed has resulted in Lleyn being one of the most numerically important maternal breeds in the UK.

Medium Sized and Easily Handled

The Lleyn ewe is smaller in size (65-85 kg) than other breeds used to produce prime lamb but is capable of rearing more than her own body weight of lambs at 14 weeks. This enables a higher stocking rate to be achieved, maximising kg of lamb produced per Ha.

Outstandingly Maternal and Productive

The Lleyn ewe mothers her newborn lambs without any fuss, but with great enthusiasm, whether she is an older, experienced ewe or a ewe lamb lambing for the first time. She is an excellent milker and her lambs are remarkably quick getting to their feet and suckling, particularly important when lambing outside in less-than-perfect-weather conditions!

Pure-bred, Cross-bred and Carcase Quality

The Lleyn ewe delivers outstanding maternal performance and efficiency, whether bred pure or crossed with any terminal sire. Pure-bred twins can be ready for slaughter at 14-16 weeks of age and with highly satisfactory carcasses (R3L or better).

When crossed with a terminal sire, the cross-bred lambs grow and grade extremely well (typically Es and Us).

Lleyn Rams

Lleyn rams are widely used for crossing on other breeds, particularly hill and upland breeds to increase lambing percentage of the resultant breeding ewes and to improve carcase quality. Lleyn rams have also been successfully used for the same reasons on commercial crossbreds with too-high terminal content.

Buy with confidence

You can have confidence in stock you buy at a Lleyn Sheep Society Sale. All stock are inspected pre-Sale for Health and Type. All rams have been inspected by the Society Ram Inspector and are licensed for life.

Some stock will have Posters indicating that they come from LLEYN GOLD flocks and some stock will have DNA Posters indicating that the animals have been DNA genotyped for specific characteristics (health, prolificacy, conformation)
