PERFORMANCE RECORDING

There is a percentage of Lley Flocks **Performance Recording**. Please note the Indexes given out at the time of sale are a representation of these flocks only and not the whole breed. It is the responsibility of the prospective buyers to understand this information.

PURCHASERS OF MVA STOCK

If you have purchased MVA stock from a registered MVA flock to put with your own MVA registered flock, please note that SRUC rules state that those animals be tested within 12 months of purchase.

GIMMERING

Accredited ewe lambs may be purchased and sold as accredited gimmers the following year under some circumstances. In summary:

- The ewe lambs may join an established accredited flock. In this case they are treated as added accredited animals (see Rule 6.2), and require an added accredited animal test 6 to 12 months after joining the flock, or before sale if this is earlier.

OR

- The ewe lambs are set up as a separate fully biosecure group. The group retains accreditation, but lose it if they are not all tested by 13 months after establishing the group (the test is due in 6-12 months, plus the one month grace period routinely added to all health certificates). If sold before the group has been established for 13 months, they can be sold as accredited with no additional testing.

IMPORTANT NOTICE TO ALL VENDORS

All Rams and Ram Lambs MUST be numbered as per catalogue.

LLEYN - THE SHEEP OF THE FUTURE

What is so remarkable about this breed?

Thirty years ago it was almost unknown outside the small Lleyn Peninsula which stretches out to the sea towards Ireland in the North West corner of Wales, and it is now found in every corner of the British Isles and more recently in Ireland.

There are very good reasons for the spread and growth of the Lleyn, despite the extreme difficulty experienced by non Welsh speaking people in pronouncing it's name.

The Lleyn ewe is an excellent mother in all respects. She lambs easily, attends to her newborn lambs without any fuss but with great enthusiasm, whether she is an older ewe or a ewe lamb lambing for the first time. She is an excellent milker and newborn lambs are remarkably quick getting on their feet and to suckle, particularly important when lambing takes place outside in weather conditions that are not ideal. A mature Lleyn flock in regular ages will naturally rear 200% crop of lambs with ease, while the ewe lamb section of the flock, which are very often mated, will result in a "bonus" crop of lambs.

The Lleyn is a naturally healthy breed and this combined with the ability to maintain a "closed" flock, ensures the maintenance of a high health status flock.

Compared with many other breeds, used to produce prime lamb, the Lleyn is smaller in size and enables a higher stocking rate to be maintained and a consequent higher sale of lambs per acre, whether bred pure or crossed with a terminal breed sire, the Lleyn produces highly satisfactory carcase lambs, classified as "U"s and "R"s, when based on good grassland systems of production, with minimum or nil concentrate use.

The Lleyn ram is also in considerable demand to cross on to other breeds, particularly hill and upland breeds to increase lambing percentages of the resultant breeding ewes and to improve carcase quality.

The Lleyn is a wonderful ewe, it is little wonder that her fame has, and still is, spreading so rapidly, and that Lleyn breeders are so enthusiastic about her performance.
